INDEX TO VOLUME 53, 2002

AUTHOR AND TITLE INDEX

(Excluding *Book Selection* and *Viewpoints*)
* = Case-Oriented Paper

Abdullah, A.:
(*see* Osman, I. H.)
Abillama, W. R.:
(*see* Zouein, P. P.)
Adekola, O. A.:
A generalised life-expectancy model for a population, 919
Adler, N. and Golany, B.:
Including principal component weights to improve discrimination in data envelopment analysis, 985
Aickelin, U.:
An indirect genetic algorithm for set covering problems, 1118
Alabas, C., Altiparmak, F. and Dengiz, B.:
A comparison of the performance of artificial intelligence techniques for optimizing the number of kanbans, 907
Aldowaisan, T.:
(*see* Allahverdi, A.)
Alidaee, B.:
(*see* Naidu, J. T.)
Allahverdi, A. and Aldowaisan, T.:
No-wait flowshops with bicriteria of makespan and total completion time, 1004
Alonso, S.:
(*see* Colebrook, M.)
Altiparmak, F.:
(*see* Alabas, C.)
Anderson, E. J.:
Markov chain modelling of the solution surface in local search, 630
Andrés, C.:
(*see* Pastor, R.)
*Angelelli, E. and Speranza, M. G.:
The application of a vehicle routing model to a waste-collection problem: two case studies, 944
Annabi, H.:
(*see* García-Murillo, M.)
*Annetts, J. E. and Audsley, E.:
Multiple objective linear programming for environmental farm planning, 933
*Antipov, A. and Meade, N.:
Forecasting call frequency at a financial services call centre, 953
Appa, G.:
On the uniqueness of solutions to linear programs, 1127
*Arenas, M., Bilbao, A., Caballero, R., Gómez, T., Rodríguez, M. V. and Ruiz, F.:
Analysis via goal programming of the minimum achievable stay in surgical waiting lists, 387
Arns, M., Fischer, M., Kemper, P. and Tepper, C.:
Supply chain modelling and its analytical evaluation, 885
Audsley, E.:
(*see* Annetts, J. E.)

Bachman, A., Cheng, T. C. E., Janiak, A. and Ng, C. T.:
Scheduling start time dependent jobs to minimize the total weighted completion time, 688
Bailey, P.:
(*see* Neighbour, M. R.)
*Baker, K. R. and Powell, S. G.:
Methods for assigning students to groups: a study of alternative objective functions, 397
Banjevic, D.:
(*see* Vlok, P. J.)
*Beasley, J. E., Howells, H. and Sonander, J.:
Improving short-term conflict alert via tabu search, 593
Beling, P. A.:
(*see* Zhu, H.)
Bell, H.:
(*see* Cherrett, T.)
Belobaba, P. P.:
(*see* Weatherford, L. R.)
Bennell, J. A., Potts, C. N. and Whitehead, J. D.:
Local search algorithms for the min-max loop layout problem, 1109
*Bertomeu, M. and Romero, C.:
Forest management optimisation models and habitat diversity: a goal programming approach, 1175
Bilbao, A.:
(*see* Arenas, M.)
Billaut, J.-C.:
(*see* Lorigeon, T.)
Bouquard, J.-L.:
(*see* Lorigeon, T.)
*Bowers, J. and Mould, G.:
Concentration and the variability of orthopaedic demand, 203
Brignall, S.:
(*see* Johnston, R.)
Brooks, M.:
(*see* Yeo, A. C.)
Brooks, R. J.:
(*see* Robinson, S.)
Bruno, G. and Laporte, G.:
A simple enhancement of the Esau—Williams heuristic for the capacitated minimum spanning tree problem, 583
*Butler, M. and Williams, H. P.:
Fairness versus efficiency in charging for the use of common facilities, 1324

Caballero, R.:
(*see* Arenas, M.)
Cavana, R. Y.:
(*see* Meimand, M.)

Chaouachi, J. S.:
(*see* Haouari, M.)
Chelst, K.:
(*see* Lockledge, J.)
Chen, S.-P. and Wei, T.-S.:
The practice of operational research in Taiwan, 1330
Cheng, T. C. E.:
(*see* Bachman, A.)
Cheng, T. C. E.:
(*see* Yu, Z.)
*Cherrett, T., McLeod, F., Bell, H. and McDonald, M.:
Journey time estimation using single inductive loop detectors on non-signalised links, 610
Chiang, C.:
Ordering policies for inventory systems with expediting, 1291
Choi, K.:
(*see* Moon, I.)
Choi, S.-H. and Kim, Y.-D.:
A traffic control algorithm for Clos network type ATM switches, 783
Christer, A. H.:
(*see* Jia, X.)
Christer, A. H.:
(*see* Mabini, M. C.)
Chung, S. H.:
(*see* Pearn, W. L.)
Coetzee, J. L.:
(*see* Vlok, P. J.)
Colebrook, M., Gutiérrez, J., Alonso, S. and Sicilia, J.:
A new algorithm for the undesirable 1-center problem on networks, 1357
Cooper, W. W., Deng, H., Huang, Z. and Li, S. X.:
Chance constrained programming approaches to technical efficiencies and inefficiencies in stochastic data envelopment analysis, 1347
Corberán, A., Fernández, E., Laguna, M. and Martí, R.:
Heuristic solutions to the problem of routing school buses with multiple objectives, 427
Cordeau, J.-F., Gendreau, M., Laporte, G., Potvin, J.-Y. and Semet, F.:
A guide to vehicle routing heuristics, 512
Corominas, A., Lusa, A. and Pastor, R.:
Using MILP to plan annualised working hours, 1101
Cortés, P.:
(*see* Lozano, S.)
Cui, Y. and Zhou, R.:
Generating optimal cutting patterns for rectangular blanks of a single size, 1338
Cunha, J. F.:
(*see* Dias, T. G.)

Díaz, J. A. and Fernández, E.:
A Branch-and-Price algorithm for the Single Source Capacitated Plant Location Problem, 728
Darby-Dowman, K. and Wilson, J. M.:
Developments in linear and integer programming, 1065
Darmon, R. Y. and Rouziès, D.:
Optimal sales force compensation plans: an operational procedure, 447
de Sousa, J. P.:
(*see* Dias, T. G.)
Dehnert, J., Freiheit, J. and Zimmermann, A.:
Modelling and evaluation of time aspects in business processes, 1038
Della Croce, F. and T'kindt, V.:
A Recovering Beam Search algorithm for the one-machine dynamic total completion time scheduling problem, 1275
Demeulemeester, E.:
(*see* Vanhoucke, M.)
Demirel, O. F. and Willemain, T. R.:
Generation of simulation input scenarios using bootstrap methods, 69
Deng, H.:
(*see* Cooper, W. W.)
Dengiz, B.:
(*see* Alabas, C.)
Despotis, D. K.:
Improving the discriminating power of DEA: focus on globally efficient units, 314
Dethloff, J.:
Relation between vehicle routing problems: an insertion heuristic for the vehicle routing problem with simultaneous delivery and pick-up applied to the vehicle routing problem with backhauls, 115
Dias, T. G., de Sousa, J. P. and Cunha, J. F.:
Genetic algorithms for the bus driver scheduling problem: a case study, 324
Dominguez-Ballesteros, B., Mitra, G., Lucas, C. and Koutsoukis, N.-S.:
Modelling and solving environments for mathematical programming (MP): a status review and new directions, 1072
Donoso, P.:
(*see* Singer, M.)
Drobouchevitch, I. G.:
(*see* Strusevich, V. A.)
Duffuaa, S. O. and Khan, M.:
An optimal repeat inspection plan with several classifications, 1016
Dullaert, W., Janssens, G. K., Sörensen, K. and Vernimmen, B.:
New heuristics for the Fleet Size and Mix Vehicle Routing Problem with Time Windows, 1232
Duran, A.:
(*see* Pastor, R.)

Fernández, E.:
(*see* Corberán, A.)
Fernández, E.:
(*see* Díaz, J. A.)
Fischer, M.:
(*see* Arns, M.)
Fitzgerald, L.:
(*see* Johnston, R.)
Fores, S., Proll, L. and Wren, A.:
TRACS II: a hybrid IP/heuristic driver scheduling system for public transport, 1093
Francis, G. and Holloway, J.:
Beyond comparisons—the role for the operational researcher in benchmarking, 283
Freiheit, J.:
(*see* Dehnert, J.)
Fu, Z.:
(*see* Li, L. Y. O.)
Fukuyama, H. and Weber, W. L.:
Evaluating public school district performance via DEA gain functions, 992

Young-Gun, G and Kang, M.-K.:
A new upper bound for unconstrained two-dimensional cutting and packing, 587

Gagné, C., Price, W. L. and Gravel, M.:
Comparing an ACO algorithm with other heuristics for the single machine scheduling problem with sequence-dependent setup times, 895
García-Murillo, M. and Annabi, H.:
Customer knowledge management, 875
Gass, S. I. and Standard, S. M.:
Characteristics of positive reciprocal matrices in the analytic hierarchy process, 1385
Gendreau, M.:
(*see* Cordeau, J.-F.)
Ghanmi, A.:
(*see* Ng, K. Y. K.)
Giosa, I. D., Tansini, I. L. and Viera, I. O.:
New assignment algorithms for the multi-depot vehicle routing problem, 977
Giri, B. C.:
(*see* Moon, I.)
*Glass, C. A.:
Bag rationalisation for a food manufacturer, 544
Gómez, T.:
(*see* Arenas, M.)
Goddard, M.:
(*see* Smith, P. C.)
Golany, B.:
(*see* Adler, N.)
*Gorunescu, F., McClean, S. I. and Millard, P. H.:
A queueing model for bed-occupancy management and planning of hospitals, 19
Gravel, M.:
(*see* Gagné, C.)
Green, R. H.:
(*see* Sutton, P. P.)
Guerrero, F.:
(*see* Lozano, S.)
Gupta, J. N. D.:
(*see* Naidu, J. T.)
Gutiérrez, J.:
(*see* Colebrook, M.)

Luo, J. and Huang, P.:
EOQ under date-terms supplier credit: a comment on a paper by Carlson and Rousseau, 1150

Midgley, G.:
Renewing the critique of the theory of knowledge-constitutive interests: a reply to Martin Reynolds, 1165
Midgley, G.:
Final reply to Reynolds—towards an enhanced OR for environmental management, 1171
Mingers, J. C.:
Reply to Ormerod—the importance of being real, 351
Mingers, J. C.:
Response to Ormerod: play it again, Sam, 357
Mingers, J. C. and O'Brien, F.:
A comment on Baker and Benn 2001: 'Assigning pupils to tutor groups in a comprehensive school', 243

O'Brien, F.:
(*see* Mingers, J. C.)
Ormerod, R. J.:
Should critical realism really be critical for OR? A comment on Mingers (2000): the contribution of critical realism as an underpinning philosophy for OR/MS and systems, 347
Ormerod, R. J.:
Response to Mingers–an overarching philosophy for OR/MS–Sed Quis Custodiet Custodies? [But who is to guard the guards against themselves] (Juvenal, c. AD 60–130), 354
Ormerod, R. J.:
A comment on Yolles (2001): Viable boundary critique, 360

Puerto, J., Gutiérrez, J. and Sicilia, J.:
Bicriteria trade-off analysis in a two-echelon inventory/distribution system, 468

Reynolds, M.:
In defence of knowledge constitutive interests. A comment on 'What is this thing called CST?' (Midgley, 1996), 1162
Reynolds, M.:
Response to Midgley—renewing critique or renewing fears?, 1169
Romero, C., Tamiz, M. and Jones, D. F.:
Reply to the comments of Ganjavi *et al*, 929
Romero, C., Tamiz, M. and Jones, D. F.:
Final reply to the comments of Professors Ganjavi *et al*, 931
Rousseau, J. J.:

SUBJECT INDEX

(This index includes all *papers*)

Acuity systems 25
Advertising 953, 1247
Agriculture 933
Air traffic control 593
Air transport 379, 593, 811
Algebraic modelling languages 1072
Algorithms 397
Allocation 405, 728
Allocative efficiency 1225
Analytic heirarchy processes 1308
Analytic heirarchy process 1385
Analytical models 885
Ant colony optimization 895
Applications 972
Applied mathematics 697
Approximation algorithm 574
Artificial intelligence 79, 222, 709
Assembly line balancing 1317
Asset-backed securitization 822
Assignment 977
Assurance regions 985
ATM switch 783
Automata 672
Available bit rate services 783

Backhauling 115
Bayesian model 119
Bayesian models 719
Bed occupancy 19
Behaviour 126
Behavioural scoring 647
Benchmarking 283, 303
Beta distribution 457
Bicriteria 1004
Bidding models 47
Bidding theory 47
Binomial test 47
Branch-and-bound algorithm 1367
Bus driver scheduling problem 324

Capacitated minimum spanning trees 583
Capacity constraint 620
Capacity planning 232
Case study 193
Chance constraints 1347
Chance-constrained programming 492
Circulating pump 193
Classification 647
Classifier combination 719
Cluster analysis 36
Clustered travelling salesman problem 972
Clustering 303, 977, 1197
Co-counselling 126
Column generation 1027, 1093
Combat 672
Combinations of moving averages 1281
Combinatorial optimisation 792
Combinatorics 552
Common cycle approach 620
Communications 752
Community OR 161
Compaign monitoring 523
Complexity 672
Compliance monitoring 523
Compromise weights 680
Computational analysis 637, 688
Construction contracts 47
Consulting 475
Core competences 475
Cost (overall) efficiency 1225
Cost allocation 1324
CPM 741
Crash cost 1048
Credit scoring 647, 719
Crisis management 1308
Customer knowledge 875
Customer knowledge management 875
Customer relationship management 875
Cutting stock problem 587, 1054, 1338

Damage assessment 523
Data envelopment analysis (DEA) 292, 314, 342, 492, 501, 664, 985, 992, 1204, 1215, 1347
Data mining 1197
DEA 303, 1225
Decision 88
Decision analysis 79, 1215
Decision support 379, 811, 1072
Decision support systems 79, 324, 842, 944
Decision-making 1256
Deconstruction 126
Defence 672, 697, 709
Degeneracy 1127
Deterministic demand 1286
Developing countries 137, 185
Discovery sampling 119
Discrete event simulation 559
Discrimination 314
Distribution 57, 961
Distribution planning 108, 1027
Distribution/logistics 842
Diversity 397
Dominance 1347
Duality 1324
Durable goods 1185
Dynamic equilibrium assignment 97
Dynamic programming 119, 1239, 1247

Earthquake preparedness 1308
Economic freedom measurement 664
Economic lot scheduling problem 620
Economics 664
Efficiency 1324, 1347
Efficiency measurement 1204
Empirical tests 47
Engineering 833
Environmental impacts 933
EOQ 922

Estimation 457
Evolutionary algorithms 1256

Facilitation 126, 149
Facility layout 1142
Fairness 1324
Family set-up 1367
Farrell and Zieschang gain functions 992
Fill rate 1268
Finance 915
Flexibility 272
Flow shop sequencing 1374
Football 88
Forecasting 811, 953, 1185, 1281
Forestry 1175
Fractals 672
Frailty 919
Fuel management 379
Functional check 1380

Game theory 1324
Gamma demand 1268
Genetic algorithms 324, 907
Geriatric medicine 19
GIS 842
Global efficiencies 314
Goal programming 211, 387, 1175
Good enough 256
Government 664
Greedy adaptive random search procedure 1142
Greedy method 792
Group decision support 36, 680
Group decision-making 126
Group scheduling 1367

Habitat diversity 1175
Health 203
Health service 185, 387
Health services 25
Heterogeneous fleet 768, 1232
Heuristic 397, 1004
Heuristics 115, 415, 427, 512, 544, 552, 637, 688, 697, 768, 792, 822, 842, 855, 944, 1093, 1118, 1133, 1142, 1232, 1275, 1317, 1374
Homogeneous and non-homogeneous population 919
Hospital bed allocation 11
Hospital bed planning 11
Hospital costs model 19
Hospitals 25, 387

Imperfect production processes 620
Indirect models 647
Information sharing 436
Information systems 36, 263
Insertion 115
Insertion algorithm 1109
Inspection error 1016
Insurance 303, 1197
Insurance case study 1038
Integer programming 108, 544, 603, 833, 1054, 1065, 1093, 1101, 1197, 1239
Integer programming formulation 1142
Integrated circuit ink-marking 211
Integrated circuit packaging 211
Inventory 108, 655, 855, 922, 1048, 1286, 1291
Inventory control 379, 436, 915, 1268, 1297

Iterated descent 1109

Joint-replenishment 1286
Just in Time system 907

Kanban 907
Kanban-controlled system 907
Knowledge management 875
Kosovo 523

Landscapes 630
Large group approaches 149
Lead time 1291
Learning 2
Leasing 822
Life expectancy 919
Linear programming 379, 680, 933, 1065, 1072, 1127, 1215, 1324
Local search 768, 1109
Local search heuristics 630
Location 185, 728, 1357
Logistics 1027
Logit-based departure time choice 97
Logscore test 47
Loop layout 1109

Machine scheduling 1275
Maintenance 336
Makespan 1004
Makespan minimisation 1367
Management accounting 256
Management learning 875
Manhattan diagram 559
Manpower planning 1101
Manufacturing 272, 1338
Marine transport 108
Marketing 1247
Markov process 88
Markov processes 961
Material requirements planning 855
Mathematical programming 1133
Matrix geometric 752
Maximal planar graph 1142
Mean survival age 919
Medicine 222
Meta-Gaussian modelling 719
Meta-heuristics 768, 1142
Metaheuristic 895
Method queues with vacations 752
Methodology 137, 369
Military 709
Minimizing tardiness 800
Minimum disagreement 664
Mix fleet vehicle routing problem 768
Model construction 79
Models 1142
Modified due date rule 800
Modified Esau–Williams heuristic 583
Multi-depot vehicle routing problem 977
Multi-objective 36, 427, 680, 933, 1175
Multidimensional knapsack 822
Multimethodology 369
Multiple service queues 752
Multiple solutions 1127

Network theory 1308
Networks and graphs 544, 1133, 1357

Neural network 907
Neural networks 222, 610, 1197
No-wait flowshop 1004
Non-linear programming 97

Open shop 1239
Operational modelling 11
Operational research 369
Operations management 256
Optimal and heuristic decomposition 800
Optimal replacement policy 193
Optimisation 427, 447, 552, 587, 630, 933, 1072, 1118, 1133, 1197
Optimization 336, 728, 1256, 1338
Options 232
OR education 2
OR groups 475
Organizational structure 247
Output analysis 559

Packing 1338
Pallet loading problem 1338
Parallel machine scheduling 864
Pareto improvement 436
Partnerships 436
Patient assignment 25
Peace support operations 523
Pedestrian network 97
Performance analysis 885
Performance evaluation 1038
Performance improvement 256
Performance management 247, 263, 272, 283, 292
Performance measurement 247, 256, 283, 292, 303, 501, 985
Piece-wise quadratic approximation 1204
Planning 544, 1072, 1256
Practice 369
Practice of OR 126, 137, 161, 283, 475, 833
Practice of OR/MS 1330
Predicted probability 47
Prediction 647
Preferences 1215
Preventive maintenance 1380
Principal component analysis 985
Probability of lowest bid 47
Problem structuring 79
Problem structuring methods 149
Process of OR 126, 137, 149
Production 1317
Production scheduling 1374
Production theory 992
Project management 405, 741
Proportional hazards model 193
Pulsation 1247
Purchasing 855

(Q, R) systems 655
Quality control 1016
Quantity discount 922
Quantity discounts 855
Queueing theory 19
Queuing 752, 961
Quick response 436

(R, s, S)-policy 1268
Ranking 985
RCM modelling 1380
Re-evaluation counselling 126
Recovering Beam Search 1275
Reduced lead time 1048
Regulation 292
Reliability 336
Repeat inspection plan 1016
Replacement 1297
Replacement policy 336
Resource 405
Response surface method 211
Retail 875
Return policy 922
Returns to cost 1225
Revenue efficiency 1225
Risk analysis 457
Road transport 57
Routing 115

Sales force 447
Scheduling 405, 603, 630, 637, 688, 895, 1054, 1093, 1118, 1239
School efficiency 992
Sea transport 415
Sealed bid auctions 47
Search theory 697
Sequence-dependent setups 895
Service industry 811, 953, 1101
Service level 1291
Set covering problem 792
Several classification 1016
Shift of mean 559
Shop scheduling 574
Short-term conflict alert 593
Simulated annealing 907, 1027
Simulation 11, 69, 203, 211, 447, 672, 709, 811, 961, 1038, 1185, 1256, 1268
Simulation optimization 907
Single machine 688, 895
Single machine scheduling 800
Soccer 88
Soft OR 149, 161
Sports 88, 501, 603
Stable solutions in MCDM 1127
Start time dependent processing time 688
Statistics 69, 222, 342
